What do you want to be when you grow up? When you think about what kind of career you war for your future, it's important to explore your options in different fields. Today, you will focus on careers in science, technology, engineering, and math (STEM). Picture Yourself in a STEM Career 1. Review STEM careers in Carolina's Innovators in Science library and on the Smithsonian's STE Careers poster. (If you don't find one that interests you there, go online and research careers STEM). 2. Choose a STEM career you could see yourself doing in the future. 3. Write the career you chose, the field it's in, and the level of education it requires.	Name:		Date:

Reflection Questions
1. Why did you choose that STEM career?
2. What are some skills or talents that you possess that you believe could be valuable in your
chosen STEM career?
3. What are some other steps you think you could take now to explore or learn more about a
future career in STEM?
